

MAXIMISE YOUR TECHNOLOGY RETURNS_

We work with senior leadership teams to support their efforts to bring business benefits from the strategic implementation of new value adding technologies. 1-2-10 is lead by experienced digital transformation executives who specialise in optimising the competitive edge of B2B businesses with a digitalisation strategy.

PLAN_

You've got a clear view of the relevant technology landscape and the options for where your business could benefit from their implementation - but you recognise that the success of a digital transformation depends on the people.

PEOPLE_

To achieve the most from the digitalisation work, the best next step is to engage the wider organisation on a collaborative deeper level. Involving them in shaping the details of the plan will help sharpen it and define the best routes to delivering it.

PROCESS_

Deeper integration of your teams from the start engages and aligns them in new constructive ways. Opportunities and risks that weren't visible before will arise and be addressed, giving you a clear maturation plan and future direction.

PERFORMANCE_

1-2-10's proven approach captures the tasks and key priorities to ensure that your organisational transformation happens together with the digitalisation efforts. We help ensure that the market success follows from the technology investment.
